FEATURES & BENEFITS

PRODUCTION / INSTALLATION FEATURES

- Dual-Shaft Design:** The TDBU Center Mount Motor features a unique dual-shaft design that allows for independent top-down and bottom-up motion, providing enhanced flexibility in controlling your shades.
- Interchangeable Power Sources:** This motor offers versatile power options, allowing you to choose between hard-wiring for continuous power or a wire-free setup with either an internal or external rechargeable battery pack. This flexibility ensures seamless integration into any shading system
- TDBU Remote Control:** The TDBU motor has 15CH and works exclusive with the TDBU motor. It controls both headrails independently via the tactile buttons and it can also move them together by pressing and holding the open or close buttons for more than 5 seconds
