

AUTOMATE.[®]

E6

The E6 motor is powered directly through a fixed cable connection, making it the ideal choice for new builds or renovations where wiring can be established during installation.

Bi-Directional Communication

ARC® (Automate Radio Communication) utilises two-way communication to provide up-to-date feedback on shade positioning via the Automate Shades app.

Favourite Positioning

Add a programmable shade position in addition to the upper and lower limits that can be defined as your "favourite".

Simplified Setup

Whether using a remote control or app for shade setup, Automate programming instructions are streamlined to have your shades moving as quickly as possible.

Precise Limit Adjustment

Incremental steps during limit setting allows for precise positioning of the shade.

ARC® (Automate Radio Communication) is Rollease Acmeda's proprietary technology utilizing 433MHz radio communication with bi-directional feedback that brings Automate motorized shading systems together.
