Automate Motor Programming Guide

1. ASSEMBLY

Please refer to separate Rollease Acmeda System Assembly Manual for full assembly instructions relevant to the hardware system being used.

2. BATTERY MANAGEMENT

For battery motors;
Prevent discharging the battery completely for extended periods, recharge as soon as the battery is discharged

CHARGING NOTES

Before first use please charge motor for 6 hours, using the recommended AC charger

⚠️ During operation, if battery is low, the motor will beep 10 times to prompt the user it needs charging.

3. PRODUCT RANGE

The Quick Start Programming Guide is universal for all Automate Motors including:
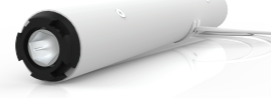

Internal Tubular

Large Tubular

0.6 Cord Lift

0.8 Cord Lift

Curtain

Tilt Motor

⚠️ Note: Curtain motor does not Jog but instead LED flashes

INSTALLER
BEST PRACTICE AND TIPS

SLEEP MODE

If pre-programmed: before shipping the motor ensure the motor is put into sleep mode so it doesn't activate during transit.

SETTLE FABRIC

Run the fabric up and down several times to ensure fabric has settled to some extent and re adjust the limits if needed

LOCK REMOTE

Prevent users accidently changing the limit; ensure the remote is locked as your last step of programming.

CHARGE 100%

For battery motors ensure the motor is fully charged as per instructions.

ZONE / GROUPS

Ask the customer the day before to think how shades will be zoned on the remote.
This may save an extra call out

INSTALLERS REMOTE

Use a spare remote to individually program each shade. Then use that remote to group rooms as per the user's needs. If you go back and service the installation later then, that same remote can be used to check the individual shades.
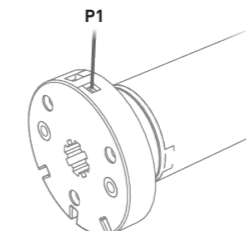

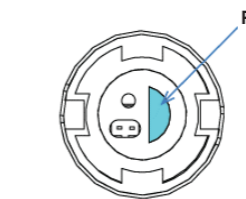

DISPOSAL AND RECYCLING

🗑️ Do not dispose of in general waste.

SAFETY

WARNING: Important safety instructions to be read before installation and use.

Incorrect installation or use can lead to serious injury and will void manufacturer's liability and warranty. It is important for the safety of persons to follow the enclosed instructions.
Save these instructions for future reference.

• Do not expose to water,moisture, humid and damp environments or extreme temperatures.
• Persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, should not be allowed to use this product.
• Use or modification outside the scope of this instruction manual will void warranty,
• Installation and programming to be performed by a suitably qualified installer.
• Follow installation instructions
• For use with motorized shading devices.
• Keep away from children.
• Frequently inspect for improper operation. Do not use if repair or adjustment is necessary.
• Keep clear when in operation.
• Replace battery with correctly specified type.

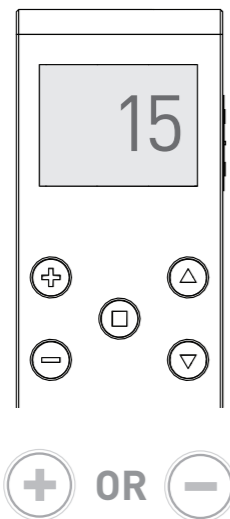

# INSTALLER
QUICK START PROGRAMMING

This setup wizard should be used for new installation or factory reset motors only.
Individual steps may not work if you haven't followed the wizard from the beginning.

STEP 1 — ON REMOTE

15

+ OR –

Press + or - buttons to select the channel that needs to be programmed

STEP 2 — ON REMOTE

⏱️ 2 SECS

* Internal Tubular pictured above. Refer to "P1 Locations" for specific devices

Press the **P1 button** on the motor for **2 Seconds** until the motor responds as below

MOTOR RESPONSE
JOG x2
BEEP x1

Within 4 seconds hold the stop button on the remote for 3 seconds. The motor will respond.

STEP 3 — CHECK DIRECTION

OR

Press up or down to check the motor direction. If correct skip to step 5

STEP 4 — CHANGE DIRECTION

⏱️ 5 SECS

If the shade direction needs to be reversed; press and hold the **up & down arrow together for 5 seconds** until the motor Jogs
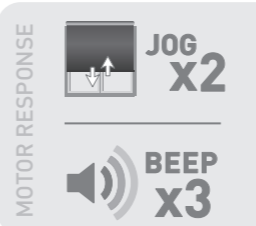

MOTOR RESPONSE
JOG x1

Reversing motor direction using this method is only possible during initial set-up.

STEP 5 — SET UPPER LIMIT

⏱️ 5 SECS

Move shade to desired top limit by pressing the **up arrow** repeatedly. Then press and hold **up & stop together for 5 sec** to save limit.
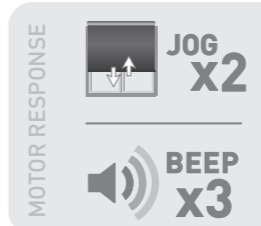

MOTOR RESPONSE
JOG x2
BEEP x3

Tap the arrow several times or hold down if needed; press arrow to stop
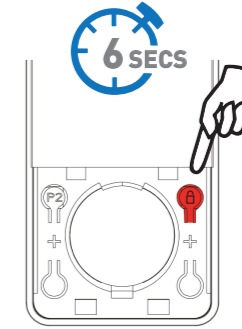

STEP 6 — SET BOTTOM LIMIT

⏱️ 5 SECS

Move shade to desired bottom limit by pressing the **down arrow** repeatedly. Then press & hold **down & stop together for 5 sec** to save limit.

MOTOR RESPONSE
JOG x2
BEEP x3

Tap the arrow several times or hold down if needed; press arrow to stop
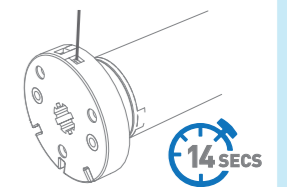

STEP 7 — SAVE YOUR LIMIT

⏱️ 6 SECS

Repeat steps 1-6 for all motors. Once complete **Press and hold the Lock button for 6 seconds** while looking at the screen **L** will appear on the screen when locked
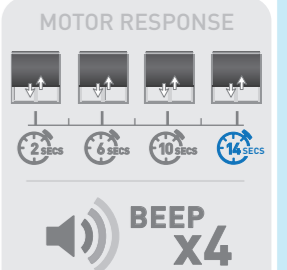

L

FACTORY RESET
MOTOR RESET PROCEDURE

To reset all settings in the motor press and hold the **P1 Button for 14 seconds**, you should see **4 independent jogs** followed by **4x Beeps** at the end.

⏱️ 14 SECS

* Internal Tubular pictured above. Refer to "P1 Locations" for specific devices

MOTOR RESPONSE
