Automate™ with Brilliant
INTEGRATION SUPPORT

AUTOMATE PULSE PRO HUB OVERVIEW
Elevate your Automate experience by seamlessly integrating Automate motorized shades with Brilliant Smart Home control systems. The Automate Pulse PRO Hub offers a powerful integration with discrete shade control and two-way communication, providing real-time updates on shade position and battery levels. Featuring both Ethernet (CAT 5) and 2.4GHz wireless connectivity, the Pulse PRO Hub ensures smooth home automation integration through an easy-to-access RJ45 port located on the back of the hub. Each hub supports up to 30 shades, making it a versatile solution for any home automation setup.

ABOUT PULSE PRO AND BRILLANT CONTROL PANEL: Your Pulse Pro turned bright. Brilliant Home control via SmartThings is the next level to operate all your smart devices under one system. The control panel comes with a camera, speaker, and microphone to take in voice commands for Google, Alexa, or HomeKit. Acquire the Pulse Pro hub, Pulse Pro app, SmartThings app, brilliant app, and Brilliant Control Panel for full system control.

GETTING STARTED:

In order to integrate your motorized window treatments with Brilliant, you will need to have:
- Downloaded the free Automate Pulse Pro via Apple App Store (available under iPhone/iPad apps) or the Google Play Store.
- Purchased one or more Automate Pulse Pro hub(s) depending on size of the space and additional repeaters if necessary.
- Install all shades/blinds/motors at desired locations.
- Connect the Hub to the Automate Pulse Pro app.
- Integrate your motorized window treatments onto Automate Pulse Pro app.
- Link your Pulse Pro account with SmartThings app.
- Download a Brilliant App and Create an account.

Note: **Free SmartThings app & account is required for Brilliant Smart Home integration**

BRILLIANT FEATURES:

All in one Smart Home control on one platform. Devices can be operated via Brilliant Control panel or brilliant app. Ease of use for users of all ages figure to operate in seconds! A microphone on the control panel for voice command ready via Alexa, Google, or HomeKit. Local operation capable when your internet connection is done. A camera used for motion sensor and security along with two-way communication via the app and control panel.

5. OPERATE SHADES VIA BRILLIANT CONTROL PANEL AND APP:
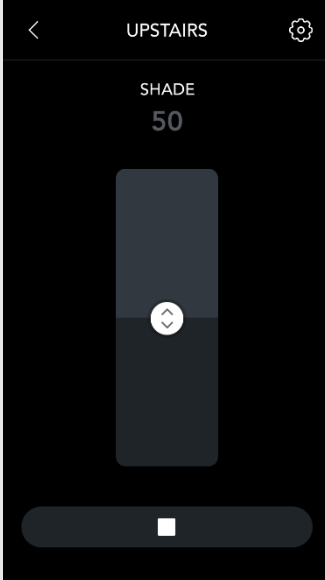

STEP 1

Select the Room and control the shades by using the SLIDER.

STEP 2

Use the discrete Open, Close, and Stop button to move your shades to a desired position.

STEP 3

Select the shade you want to control and move the SLIDER to a precise position.

6. TIPS:

- Naming your shades accordingly in the Pulse Pro app will reduce the work of naming the shades later linking via SmartThings & Brilliant Home.

- Use the same App Credentials you have with Pulse Pro App, Smart Things and Brilliant for seamless integrations.

FREQUENTLY ASKED QUESTIONS

AUTOMATE™

Do I have to use SmartThings?
Yes. SmartThings is the only way to integrate your Pulse Pro with Brilliant.

Do I need to purchase a SmartThings hub?
No. Only the free SmartThings app is required.

Can I use the brilliant app without the control panel?
Yes. You can download the Brilliant App and create an account without a need of having a control panel to integrate with.

Does the Pulse Pro work with Brilliant?
No. There is no integration with Pulse 1 Hub and Brilliant Smart Switches.

Can I use the SmartThings Integration without a Brilliant Panel?
Yes. The Pulse Pro Hub has a native integration with Smart Things.

How can I connect my window treatment to Brilliant?
By utilizing the Pulse Pro app with SmartThings, you can use the existing integration to link all your Automate Shades into Brilliant App and integrate with everything else you already have on your Control Panel.

Why do I need to use SmartThings app to integrate Automate Shades with Brilliant?
SmartThings is the medium between the Pulse Pro hub and Brilliant Home.
