

# AUTOMATE™

## Magnetic Charger

### CONVENIENT MAGNETIC CHARGING DEVICE NOW AVAILABLE FOR AUTOMATE WIREFREE TUBULAR MOTORS

The Automate Li-ion battery motors are a robust solution for new and retrofit shade applications. The lithium ion battery can hold a charge up to 500 shade cycles, but like every battery device a recharge is required. Charging Automate shades has never been easier with the latest release of the Magnetic Charger. Simply snap the charger in place and pull off when fully charged.

A strong magnetic pull force eliminates the need for a ladder to access the charging port; bringing greater independence to home occupants when a recharge to their Automate shading system is needed. Removal of the magnet is a simple pull to disconnect. The attached motor pole is discreetly hidden and out-of-site when charging is idle preserving the finished aesthetic of the window shade.

#### WORKS WITH:

- AUTOMATE | Li-ion 1.1
- AUTOMATE | Li-ion Q2.0
- AUTOMATE | Li-ion 3.0
- AUTOMATE | Li-ion Q3.0
- AUTOMATE | Li-ion Q10.0
- AUTOMATE | Charger
- AUTOMATE| Rechargeable Battery Packs

#### PRODUCT APPLICATIONS:

Any variety of Roller Shades (Open Roll, Facia, and Cassette), Cellular Shades, Tilting Blinds, etc.
